## Icom Showcases Bluetooth-Enabled Handhelds

**KIRKLAND, Wash. (April 2021)** – With the light at the end of the tunnel in sight, in-person trade shows are slowly reemerging. After last year's show cancellation, Sun 'n Fun returns April 13<sup>th</sup> – 18<sup>th</sup>, 2021, with the promise of all events occurring outside in the open air.

Find Icom at booth D-028 and D-029. There we will have on display the popular Bluetooth-enabled handhelds, the A16 and A25N. The A16 is the perfect compact VHF COM radio for the student pilot; it was designed for one-hand operation, making it easy to use on the flight line by ground crew, and can also be used as a backup radio for any aircraft. With a battery that lasts up to 17 hours, this radio pays for itself in engine hours and fuel.

The A25N is Icom's powerful VHF NAV/COM air band handheld radio, packing 6W of class-leading output power. With a 2.3-inch high-visibility display and large characters, viewing at a glance, day or night, is effortless. The enlarged flat sheet keypad offers smooth and swift operation. The A25N has many built-in navigation functions. Built-in GPS with Simplified Waypoint NAV, VOR Navigation, Near Station Search Function, and even make flight plans with the RS-AERO1A Android™ or RS-AERO1I iOS app.

See innovation at its best, up close and personal. Our A220 is steadily a popular panel-mount air band transceiver for sport and experimental pilots. Work on both 8.33 kHz and 25 kHz channel spacing frequencies, and take advantage of the large, illuminated FLIP-FLOP button, designed to be seen and pressed with ease. Visibility is a breeze with a bright OLED screen; information displayed is bright, vivid, and is high contrast, providing a wide-viewing-angle. The A220 also has a built-in two-station intercom, 12 or 24-volt compatible, automatic squelch, and GPS memory function.

AIR. LAND. SEA.

Visit the show for rebate specials! \$50 savings for all versions of the A25 and \$100 off of any A220. Icom Avionic rebates are online and can be found [here](#).

Icom designs its handheld radios and panel mounts with pilots in mind and is known worldwide for manufacturing the most impressive avionic radios.
